INTRODUCTION

The International Symposium on ICT management and administration 2019 organized by UPM's InfoComm Development Center (iDEC) and Database Technologies and Application Research Group (DbTA) is an excellent platform for researchers as well as practitioners of ICT management and administration to discuss and present original ideas, recent results and achievements on issues and challenges related to ICT management and administration. Authors are invited to submit extended abstracts describing original research. Submitted papers must not have been published elsewhere or be currently under review by another conference or journal.

The focus of ISICTMA2019 is on the latest, most-efficient or state-of-the-art methods in ICT management and administration covering data management and system management in both technical and theoretical aspects.

OBJECTIVE

Improve the skills and understanding of university's ICT governance holistically among university ICT administrators.

Share experience, results of research and best practices of IPT ICT management and administration towards realizing a sustainable smart campus.

Strengthening effective relationships, networks and interactions among IPT ICT administrators.

Provide opportunities and exposure to ICT administrators to make presentations in conferences based on their respective areas of work.

Improve strategic communication between university ICT administrators.
